

PLOTS

The graphs from various models: the four models used in the research

Decision Tree Model: Prediction Error Distributions

Decision Tree Model: Top 15 Feature Importances for PM2.5 Prediction

Decision Tree Model: Time Series Predictions vs Actual

Isolation Forest: PM2.5 Anomaly Detection Timeline

Isolation Forest: Feature Comparison (Normal vs Anomaly)

Isolation Forest: Anomaly Distribution by Hour

Random Forest Model: Actual vs Predicted Values

Random Forest Model: Prediction Error Distributions

Random Forest Model: Time Series Predictions vs Actual

XGBoost Model: Actual vs Predicted Values

XGBoost Model: Time Series Predictions vs Actual
